## Year 11 Autumn T1 - Topic: Linear Graphs

Prior learning:

- Understand the terms 'perpendicular lines' and 'parallel lines'
- Use coordinates in the first quadrant, such as plot the point $(3,2)$
- Use coordinates in all four quadrants, such as plot the points $(3,-2),(-2,1)$ and $(-4,-3)$
- Add, subtract, multiply and divide integers
- Find multiples of a number
- Substitute positive and negative numbers into a formula such as $P=2 I+2 w$
- Recognise and describe arithmetic and geometric sequences
- Generate a sequence of numbers or diagrams from a term-to-term rule
- Write the term-to-term rule of a simple sequence
- Find the nth term of a sequence or a series of diagrams
- Generate a sequence of a series of diagrams given the nth term
- Find a particular term in a sequence
- Justify whether a number is a term of a sequence

\hline \multicolumn{7}{|c|}{Learning sequences} \& Endpoints \\
\hline \& Grade 3 \& MW \& Grade 4-5 \& MW \& Grade 8 \& Mw \& \\
\hline  \& \begin{tabular}{l}
- Find coordinates of points determined by geometrical information \\
- Understand the equation of a straight line, interpreting the gradient and intercept \\
- Using ratio to find the gradient base:height \\
- Find the gradient of a straight-line graph \\
- Find the gradient of a line given two coordinates
\end{tabular} \& 113
3

3

3 \& \begin{tabular}{l}
- Find midpoints of two coordinates (2D and 3D) <br>
- Sketch a linear function from its equation <br>
- Find the equation of a straight line from a graph <br>
- Find the equation of a straight line given two coordinates <br>
- Find the equation of a straight line given a parallel line and a point <br>
- Interpret a straight line graph in a real life context <br>
- Interpret the gradient of a graph in the context of a question <br>
- Interpret the intercept of a graph in the context of a question <br>
- Draw and interpret distance-time graphs <br>
- Work out an average speed from a distance-time graph

 \& 

133 <br>
159a <br>
159b <br>
159b <br>
143 <br>
143

 \& 

- Introduce $\mathrm{f}(\mathrm{x})$ notation <br>
- Find the gradients of perpendicular straight-line graphs <br>
- Prove two lines are parallel or perpendicular <br>
- Find the equation of a straight line given a perpendicular line and a point
\end{tabular} \& 208

208 \& | - Work with coordinates in all four quadrants |
| :--- |
| - Identify gradients and intercepts of straight line graphically and algebraically |
| - Use the form $\mathrm{y}=\mathrm{mx}+\mathrm{c}$ to identify parallel lines |
| - Use the form $\mathrm{y}=\mathrm{mx}+\mathrm{c}$ to identify perpendicular lines ( H ) |
| - Find the equation of a straight line give coordinates |
| - Identify the gradient of a straight line graph as a rate of change. |
| - Use graphs to solve problems involving distance, speed and acceleration. | <br>

Year 11 Autumn T1 - Topic: Handling Data

## Prior learning:

- Use probabilities given to calculate expected values (capture/recapture)
- Use stratified sampling methods
- Product rule for counting

## Learning sequences

## Year 11 Autumn T1 - Topic: Trigonometry

## Prior learning

- Rearrange linear formulae such as $p=3 q+5$
- Substitute positive and negative numbers into a formula such as $P=2 l+2 w$
- Convert between fractions, decimals and percentages

| Learning sequences |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 5 | MW | Grade 7+ | MW |  |
|  | - Label the vertices and sides of a triangle <br> - Understand that sine, cosine and tangent are ratios <br> - Know the exact trigonometric values for $\left(30^{\circ}\right.$, $45^{\circ}, 60^{\circ}, 90^{\circ}$ ) <br> - Use trigonometry to find missing side lengths in right angled triangles <br> - Use trigonometry to find missing angles in right angled triangles <br> - Use trigonometry to calculate angles of elevation | $\begin{aligned} & 173 \\ & 168 \\ & 168 \end{aligned}$ | - 3D Trigonometry <br> - Pythagoras and Trigonometry <br> - Use the sine rule to find missing sides and angles in non-right angled triangles <br> - Use the cosine rule to find missing sides and angles in non right angled triangles <br> - Find the area of triangles using $1 / 2 \mathrm{ab} \operatorname{sinC}$ | 218 <br> 201 <br> 202 <br> 203 | - Use trigonometric ratios to find missing lengths and angles in triangles <br> - Find the exact values of $\sin \theta, \cos \theta$ and $\tan \theta$ for key angles. <br> - Use the sine and cosine rules to find missing lengths and angles. (H) |
| Assessments O End of Block Test <br> O In class exit tickets and Homework <br> O Mid and End of year tests |  |  |  |  |  |

## Where will we use these ideas again:

This is often linked to areas and perimeters of shapes

- Represent ratios
- Use the fact that the angles of a triangle add up to 1800 to find angles
- Use Pythagoras' theorem to find missing sides
- Solve one step equations such as $3 x=12$ or $\mathrm{x}+$ $5=9$
- Solve two step equations such as $3 x-1=9$ and $3(x+4)=15$ Understand the terms

[^0]
## Year 11 Autumn T2 (Higher only) - Circle Theorems

## Prior learning:

- Draw diagrams from written descriptions
- Estimate angles and measure them accurately
- Draw angles accurately
- Construct a circle using a pair of compasses, given a centre and a point on the circumference
- Understand the term equidistant
- Understand and use the perpendicular distance from a point to a line as the shortest distance to the line
- Know the definition of a circle and identify the, centre, radius, diameter and circumference
- Recognise complex parts of circle such as tangents, arcs, sectors, chords and segments
- Use the fact that the angles of a triangle add up to 1800 to find angles
- Use angles in a quadrilateral add up to 360

| Learning sequences |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 6 | MW | Grade 7+ | MW |  |
|  | - Use and apply the six circle theorems <br> - Prove that the angle at the centre is twice the angle at the circumference <br> - Prove that angles in semi-circle are equal to $90^{\circ}$ <br> - Prove the same segment theorem <br> - Prove the alternate segment theorem <br> - Recognising the similar triangles formed when two chords intersect | $\begin{aligned} & \hline 183 \\ & 184 \\ & 184 \\ & 184 \\ & 184 \end{aligned}$ | - Use the intersecting chords theorem to find length <br> - Secant Theorem <br> - Opposite angles of a cyclic quadrilateral add to $180^{\circ}$ <br> - Pythagoras' Theorem with circle theorems | 183 | - Prove and apply circle theorems (H) |
| Assessments O End of Block Test <br> O In class exit tickets and Homework <br> O Mid and End of year tests |  |  |  |  |  |

## Where will we use these ideas again:

Circle theorems are often included in questions involving circle graphs

## Year 11 Autumn T2 (Foundation) - Angles Review, Construction, Congruence, Similarity and Loci

## Prior learning:

- Understand the word congruent and identify congruent shapes
- Draw diagrams from written descriptions
- Measure a line accurately to the nearest millimetre
- Construct simple shapes on squared paper
- Estimate angles and measure them accurately
- Draw angles accurately
- Construct a circle using a pair of compasses, given a centre and a point on the circumference
- Understand the term equidistant
- Understand and use the perpendicular distance from a point to a line as the shortest distance to the line

\begin{tabular}{|c|c|c|c|c|c|}
\hline \multicolumn{5}{|c|}{Learning sequences} \& Endpoints \\
\hline \multirow{8}{*}{} \& Grade 2 \& MW \& Grade 4 \& MW \& \\
\hline \& - Draw an SAS triangle with ruler and protractor \& 47
47 \& \multirow[t]{5}{*}{\begin{tabular}{l}
- Find the lengths in similar shapes \\
- Understand the word "similar" and be able to identify similar shapes \\
- Understand the word "congruent" and be able to identify congruent shapes \\
- Understand and apply mathematical similarity \\
- Draw an SSS triangle with ruler and compasses \\
- Draw a quadrilateral such as a kite or a parallelogram with given measurements with ruler and protractor \\
- Use angle facts to prove triangles are congruent in more complex questions (e.g. bow tie question) \\
- Construct the perpendicular bisector of a line \\
- Construct the angle bisector \\
- Construct the perpendiculars to and from a point \\
- Construct the angles of 60 and \(90{ }^{\circ}\) with a ruler and compass
\end{tabular}} \& 144 \& \multirow[t]{7}{*}{\begin{tabular}{l}
- Measure line segments and angles accurately \\
- Describe and apply the properties of angles at a point, on a line and at intersecting and parallel lines. \\
- Derive and use the sum of angles in a triangle \\
- Derive and apply the properties and definitions of special types of triangles and quadrilaterals \\
- Identify and use congruence and similarity \\
- Deduce and use the angle sum in any polygon \\
- Calculate interior and exterior angles for regular polygons \\
- Construct triangles \\
- Use the standard ruler and compass constructions \\
- Solve loci problems
\end{tabular}} \\
\hline \& Review Topics \& MW \& \& \& \\
\hline \& \multirow[t]{5}{*}{\begin{tabular}{l}
- Recognise corresponding, alternate and co-interior angles \\
- Recognise vertically opposite angles and know that they are equal \\
- Understand why some shapes tessellate and others do not \\
- Use the fact that the angles of a triangle add up to 180 응 to find angles \\
- Use angle properties of isosceles, equilateral and rightangled triangles \\
- Calculate interior and exterior angles of a quadrilateral \\
- Calculate the sum of angles in any polygon \\
- Calculate exterior and interior angles of a regular polygon \\
- Prove that the angles of a triangle add up to 1800 and use this to find angles \\
- Prove the exterior angle of a triangle is equal to the sum of the two interior angle \\
- Prove that the angles in a quadrilateral add up to \(360^{\circ}\)

## Year 11 Autumn T2 - Bearings and Scale Drawings

## Prior learning:

- Estimate angles and measure them accurately
- Draw angles accurately
- Recognise corresponding, alternate and co-interior angles
- To be able to convert between metric units such as m to $\mathrm{cm}, \mathrm{kg}$ to g , litres to ml
- Be familiar with the unitary method
- Calculate parts of a ratio given one quantity

| Learning sequences |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 2 | MW | Grade 3 | MW | Grade 7+ | MW |  |
| Main learning Steps | - Estimate angles and measure them accurately <br> - Draw angles accurately <br> - Be familiar with the unitary method | $\begin{gathered} \hline 46 a \\ 46 \mathrm{~b} \\ 42 \end{gathered}$ | - Recognise corresponding, alternate and co-interior angles <br> - To be able to convert between metric units such as m to cm , kg to g , litres to ml <br> - Calculate parts of a ratio given one quantity <br> - Know the three rules of bearings <br> - Find the bearing between two points <br> - Draw a point on a fixed bearing from another point <br> - Given a bearing, find the reverse bearing <br> - Use and interpret map scales <br> - Draw and interpret scaled diagrams in real-life contexts | $\begin{array}{\|l\|} \hline 120 \\ 112 \\ 106 \\ \\ 124 \\ 124 \\ 124 \\ 124 \\ 124 \\ 124 \end{array}$ | - Bearings with Pythagoras and Trigonometry |  | - Use scale factors, scale diagrams and maps. <br> - Measure line segments and angles accurately <br> - Interpret maps and scale drawings <br> - Use bearings <br> - Use bearings to specify directions (H) |
| Assessments 0 End of Block Test <br> O In class exit tickets and Homework <br> O Mid and End of year tests |  |  |  |  |  |  |  |

Where will we use these ideas again:
Bearings will be revisited again with trigonometry and angles in parallel lines
Scale drawings as a concept is revisited within enlargement

## Year 11 Autumn T2-Graphs 2

## Prior learning:

- Use coordinates in the first quadrant, such as plot the point $(3,2)$
- Use coordinates in all four quadrants, such as plot the points $(3,-2),(-2,1)$ and (-4,-3)
- Perform addition and subtraction calculations involving negatives
- Perform multiplication and division calculations involving negatives
- $\quad$ Solve one step equations such as $3 x=12$ or $x+5=9$
- Solve two step equations such as $3 x-1=9$ and $3(x+4)=15$
- Rearrange linear formulae such as $p=3 q+5$
- Substitute positive and negative numbers into a formula such as $P=2 l+2 w$
- Plot the graphs of horizontal lines such as $y=4$ and vertical lines such as $x=3$
- Draw the graph for equations such as $y=2 x+3$ and recognise these are linear
- Solve problems involving graphs, such as finding where the line $y=x+2$ crosses the line $y=1$
- Draw graphs of quadratic functions such as $y=3 x^{2}$ and $y=x^{2}+4$ using a table of values
- Use graphs to find the approximate solutions of quadratic equations
- Sketch a simple quadratic function such as $y=x^{2}+4$
- Identify the turning points of a quadratic graph
- Identify the roots and intercepts from a quadratic graph
- Using symmetry, identify the turning points of a quadratic graph

| Learning sequences |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 3\&4 | MW | Grade 5 | MW | Grade 7-8 | MW |  |
| Main learning Steps | - Solve problems involving graphs, such as finding where the line $y=x+2$ crosses the line $y=1$ <br> - Solve simultaneous equations graphically <br> - Draw graphs of quadratic functions such as $y=3 x^{2}$ and $y=x^{2}+4$ using a table of values <br> - Use graphs to find the approximate solutions of quadratic equations <br> - Sketch a simple quadratic function such as $y=x^{2}+4$ | 96 140 98 98 99 | - Plot and draw a cubic graph <br> - Recognise and sketch simple cubic functions <br> - Recognise non-linear graphs and their equations <br> - Plot and draw a reciprocal graph <br> - Recognise and sketch simple reciprocal functions <br> - Plot and draw an exponential graph <br> - Set up and solve (algebraically) two linear simultaneous equations in two variables, interpreting the solution in context <br> - Solve a pair of simultaneous linear equations algebraically <br> - Identify the turning points of a quadratic graph <br> - Identify the roots and intercepts from a quadratic graph <br> - Using symmetry, identify the turning points of a quadratic graph | $\begin{array}{\|c\|} \hline 161 \\ 161 \\ 162 \\ \\ 162 \\ 160 \\ 160 \\ 160 \end{array}$ | - Recognise and sketch the exponential graph <br> - Solve problems involving the exponential function <br> - Complete the square by rewriting quadratics <br> - Use completing the square to solve equations <br> - Use completing the square to find maximum and minimum values <br> - Know and use the equation of a circle <br> - Find the equation of a circle <br> - Find the equation of a tangent to a circle <br> - Sketch a more complex quadratic graph, finding the turning points by completing the square | $\begin{gathered} 194 \\ 194 \\ 209 a \\ 209 b \\ 209 \mathrm{c} \\ 197 \\ 197 \\ 160 \end{gathered}$ | - Draw graphs to identify and interpret roots, intercepts and turning points of quadratic functions. <br> - Solve quadratic equations by finding approximate solutions using a graph. <br> - Recognise and draw graphs of cubic and reciprocal functions <br> - Recognise and draw graphs of exponential functions (H) <br> - Recognise and draw graphs of trigonometric functions. (H) <br> - Recognise and use simple equations of circles and find the tangent to a circle at a point. (H) |
| Assessments O End of Block Test <br> O <br> O <br> O Class exit tickets and Homework |  |  |  |  |  |  |  |

Year 11 Autumn T2 - Ratio Review

| Learning sequences |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Main learning Steps | Grade 2 | MW | Grade 3 | MW | Grade 5 | MW |  |
|  | - Represent ratios <br> - Simplify ratios <br> - Solve recipe problems involving ratio | $\begin{aligned} & 38 \\ & 38 \\ & 39 \end{aligned}$ | - Share a quantity into a given ratio <br> - Calculate parts of a ratio given one quantity <br> - Recognise the relationships derived from equivalent ratios | $\begin{array}{\|l\|} \hline 106 \\ 106 \\ 107 \\ \hline \end{array}$ | - Convert a ratio into an equation | $\begin{aligned} & 106 / \\ & 165 \mathrm{c} \end{aligned}$ | - Divide a quantity in a given ratio and reduce a ratio to its simplest form. |
|  |  |  |  |  | Grade 7+ |  |  |
|  |  |  |  |  | - Harder ratio and equations <br> - Harder worded questions with ratios | $\begin{gathered} 200 \mathrm{bc} \\ 200 \mathrm{a} \end{gathered}$ |  |
| Assessments ${ }^{\text {a }}$ |  |  |  |  |  |  |  |

## Year 11 Spring T1 - Combined Events

## Prior learning:

- Fractions - 4 operations
- Decimals - 4 operations
- Express a probability as a fraction, decimal or percentage
- Use the fact that the probabilities of mutually exclusive outcomes add up to 1 and complete a probability table
- Use the fact that the probabilities of mutually exclusive outcomes add up to calculate other probabilities (the OR rule)
- Solve equations from probability problems
- List outcomes systematically
- Use a sample space or a list to find probability of two events happening
- Write all the combinations from a list
- Identify permutations from a list
- Draw a sample space
- Use a two-way table to find a probability
- Design and use frequency trees
- Understand and use relative frequency / experimental probability
- Use probability to estimate outcomes for a population
- Understand the term set
- Recognise and define the universal set
- Sort data into a Venn diagram
- Find the intersection from a Venn diagram
- Find the union from a Venn diagramEstimate angles and measure them accurately

| Learning sequences |  |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Grade 3 | MW | Grade 6 |  | Grade 7 | MW |  |
|  |  | d use Venn diagrams to find <br> d use the notation for union and complement n diagram to solve multi-step | $127 a$ $127 b$ $127 a$ | - Find probabilities of dependent events from a tree diagram <br> - Understand the concept of conditional probability <br> - Find conditional probability from a table, Venn diagram or tree diagram <br> - Use a Venn diagram to calculate probability <br> - Use set notation when describe probabilities <br> - Extend understanding of Venn Diagrams to three regions <br> - Forming equations with dependent events | $\begin{aligned} & \hline 151 \\ & 175 \end{aligned}$ | - Find probabilities of successive independent events without a tree diagram <br> - Find the probability of a combination of mutually exclusive events from a tree diagram (the OR rule) <br> - Find probabilities of successive dependent events without a tree diagram | $\begin{aligned} & 204 \\ & 204 \end{aligned}$ | - Use Venn diagrams to represent sets, to record outcomes and to calculate probabilities of events. <br> - Use tree diagrams to show the frequencies or probabilities of two events <br> - Calculate the outcome of two experiments with or without a tree diagram. <br> - Calculate conditional probabilities. |
|  |  | Grade 4 \& 5 | MW |  |  |  |  |  |
|  | - Complete a probability tree diagram involving independent events <br> - Find probabilities of successive independent events from a tree diagram <br> - Understanding how probabilities change in experiments without replacement <br> - Complete a probability tree diagram involving dependent events (e.g. without replacement) <br> - Find the probability of an event occurring given information as ratios <br> - Understand the concept of conditional probability |  | 151 175 175 175 |  | 185 185 |  | 204 |  |
| Assessments |  | - End of Block Test <br> - In class exit tickets and Ho <br> - Mid and End of year tests | mewor |  |  |  |  |  |

## Year 11 Spring T1 - Units and Proportionality

## Prior learning:

- Solve questions involving best value for money
- Solve simple direct proportion (e.g. given the cost of 5 items, find the cost of 3 )
- Be familiar with the unitary method
- Understand and use compound measures (SDT, DMV, FPA etc) in simple questions
- Understand and use compound measures (SDT, DMV, FPA) in more complex questions involving more than one part
- Know the conversions for metric units and money

| Learning sequences |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 3 | MW | Grades 4 \& 5 | MW | Grade 7+ | MW |  |
|  | - Solve proportion problems involving exchanging money <br> - Draw and/or use conversion graphs, including for temperature and currency conversion <br> - Convert between imperial and metric units such as cm to inches, kg to lbs, litres to pints given the conversions | $\begin{aligned} & 105 \\ & 107 \end{aligned}$ | - Convert between different units of compound measures <br> - Solve indirect proportion questions involving work rate (e.g. how many man-hours) <br> - Recognise graphs showing direct and inverse proportion | 199 | - Understand and solve simple problems involving direct proportion ( $y \times x$ ) <br> - Understand and solve simple problems involving indirect proportion (y $\alpha 1 / x$ ) <br> - Recognise the graphs showing direct and inverse proportion <br> - Understand and solve more complex problems involving direct and indirect proportion ( $\mathrm{y} \alpha \mathrm{x}^{2}$ ) | $\begin{aligned} & 199 \\ & 199 \\ & 199 \\ & 199 \end{aligned}$ | - Solve direct and inverse proportion problems. <br> - Describe direct and inverse proportion relationships using an equation. <br> - Recognise graphs showing direct and inverse proportion |
| Assessments O End of Block Test <br> O In class exit tickets and Homework <br> O Mid and End of year tests |  |  |  |  |  |  |  |

## Year 11 Spring T2 (Higher only) - Functions and Proof

## Prior learning:

- Algebraic expressions - manipulation, factorisation, expanding brackets
- Number facts even + odd = odd etc
- Divisibility rules
- Changing the subject
- Substitution
- $\mathrm{F}(\mathrm{x})$ notation
- Plotting graphs

| Learning sequences |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Main learning Steps |  | Grade 5 | MW | Grade 8 | MW |  |
|  |  | ematical reasoning (e.g. counterto prove or disprove arithmetic s | 156 | - Evaluate functions by substituting values of $x$ <br> - Find the inverse of a basic function where $x$ appears only once <br> - Find the inverse of a basic function where x appears more than once <br> - Define a composite function <br> - Evaluate a composite function by substituting values of $x$ <br> - Solve equations involving functions and composite functions <br> - Evaluating functions with indices | $\begin{gathered} 215 \\ 214 a \end{gathered}$ | - Write an equation to represent a function, and find inputs and outputs. <br> - Find the inverse of a function and construct and use composite functions. <br> - Construct proofs of simple statements using algebra. |
|  |  | Grade 7 | MW |  | 214b |  |
|  | - Complete algebraic proofs |  | 193 |  | $\begin{aligned} & 215 \\ & 215 \\ & 215 \end{aligned}$ |  |
| Assessments O End of Block Test <br> O In class exit tickets and Homework <br> O Mid and End of year tests |  |  |  |  |  |  |

## Year 11 Spring T2 (Foundation only) - Algebra Review and Proof

## Prior learning:

- Algebraic expressions - manipulation, factorisation, expanding brackets
- Number facts even + odd = odd etc
- Divisibility rules
- Changing the subject
- Substitution
- $\mathrm{F}(\mathrm{x})$ notation
- Plotting graphs

| Learning sequences |  |  |  |  |  |  | Endpoints |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Grade 1-2/Acquiring | MW | Grade 3/Working Towards | MW | Grade 4/on track | MW |  |
|  | - Know and use correct algebraic conventions (e.g. $4 \times x=4 x, \mathrm{~m} / 2$ ) and form simple algebraic expressions from a given scenario <br> - Understand what expressions, equations, formulae and identities are <br> - Simplify expressions involving addition and subtraction with one variable such as $a+2 a+3 a$ <br> - Simplify expressions involving addition and subtraction with more than one variable such as <br> - $2 a+5 b-a-2 b$ <br> - Simplify expressions by multiplying expressions <br> - Simplify expressions by dividing expressions <br> - Use correct algebraic notation understanding the terms input and output <br> - Understand how to translate basic phrases into algebra (e.g. more than, less than, double) <br> - Form simple algebraic expressions from a given scenario <br> - Understand what a formula is <br> - Use a formula written in words, such as Cost $=20 \times$ distance travelled | 7 33 33 33 34 35 7 | - Expand a single set of brackets such as $3(x+2)$ and $4 x(x-3 y$ <br> - Factorise expressions such as $6 \mathrm{a}+8$ and $\mathrm{x}^{2}-3 \mathrm{x}$ <br> - Substitute positive and negative numbers into a formula such as <br> - $P=2 l+2 w$ <br> - Substitute numbers into more complicated formulae such as <br> - $C=(A+1) D / 9$ <br> - Solve one step equations such as $3 x$ $=12$ or $x+5=9$ <br> Grade 4/on track <br> - Apply the multiplication and division law of indices to simplify algebraic expressions such as $3 w x^{2} y^{3}$ <br> - Expand and simplify expressions such as $x\left(x^{2}-5\right)$ and $3(x+2)-5(2 x-1)$ Factorise expressions such as $6 \mathrm{a}+8$ and $\mathrm{x}^{2}-3 \mathrm{x}$ <br> Form equations and formulae from a given scenario Rearrange linear formulae such as $p$ $=3 q+5$ <br> Solve two step equations such as $3 x$ $-1=9$ and $3(x+4)=15$ | 93 <br> 94 <br> 95 <br> 94 <br> 95 <br> 135 <br> 136 <br> 131 <br> $134 a$ <br> 94 <br> 137 <br> 136 <br> 135 | - Solve equations with the variable on both sides such as $3(x-4)=5+x$ <br> - Apply the multiplication and division law of indices to simplify algebraic expressions such as $3 w x^{2} y^{3} \times 6 w^{2} x y$ <br> - Represent simple inequalities on a number line <br> - Solve linear inequalities <br> - Represent solutions to inequalities using set notation <br> Grade 5/On Track <br> - Use mathematical reasoning (e.g. counter-example) to prove or disprove arithmetic statements <br> - Understand what an identity is by using reasoning to show two expressions are equivalent <br> - Use index notation and index laws for negative powers <br> Grade 7+ /extending <br> Rearrange formulae that include brackets, fractions and square roots Rearrange formulae where the variable appears twice Use algebra to prove identities Use index notation and index laws for fractional powers Simplify algebraic fractions (linear factorising) | 135 <br> 135 <br> 138 <br> 139 <br> MW <br> 156 <br> 193 <br> 154 <br> $19 W$ <br> 190 <br> 190 <br> 193 <br> 188 <br> $210 a$ <br> 10 | - Use algebraic notation <br> - Substitute numbers into formulae and expressions <br> - Use and understand the words expressions, equations, formulae, terms and factors <br> - Collect like terms and simplify expressions involving sums, products, powers and surds. <br> - Expand single brackets <br> - Factorise into single brackets <br> - Application of rules of indices to algebra <br> - Linear inequalities <br> - Algebraic fractions introduction (H) |

## Year 11 Spring T2 - Vectors

## Prior learning:

- Column vectors
- Draw column vectors
- Translations
- Collect like terms

## Year 11 Spring T2 (Foundation only) - Numbers Review

\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline \multicolumn{7}{|c|}{Learning sequences} \& Endpoints \\
\hline \& Grade 1 \& 2 \& MW \& Grade 3 \& MW \& Grade 3 \& MW \& \\
\hline  \& \begin{tabular}{l}
Find the factors of a number Find multiples of a number Identify prime numbers Recognise special types of numbers (even, odd, squares, cubes, factors, multiples) \\
Rewrite repeated multiplication using powers Understand the meaning of roots \\
- Apply the multiplication and division rule of indices to numbers \\
- Use simple fractions to describe proportions of a whole \\
- Shade in a fraction of a picture \\
- Use shading to determine which fraction is bigger \\
- Convert between improper and mixed fractions \\
- Identify and find equivalent fractions \\
- Simplify fractions \\
- Compare two fractions with the same denominator \\
- Understand that percentage means "out of 100" \\
- Write down the place value of an integer digit, e.g. the 4 in 24,201 \\
- Order integers up to the ten thousands place
\end{tabular} \&  \& \begin{tabular}{l}
- Express one quantity as a percentage of another using a calculator \\
- Express one quantity as a percentage of another using non-calculator methods \\
- Increase or decrease a quantity by a given percentage \\
- Calculate simple interest \& depreciation \\
- Calculate a percentage increase or decrease using a multiplier \\
- Work out reverse percentage problems \\
- Work out the percentage change \\
- Write a fraction or percentage from a given ratio and vice versa \\
- Write a number as a product of prime factors \\
- Find the HCF of two numbers using appropriate methods \\
- Find the LCM of two (or more) numbers using appropriate methods \\
- Calculate squares and square roots (with and without calc) \\
- Calculate cubes and cube roots (with and without calc) \\
- Evaluate calculations involving powers \\
- Estimate square and cube roots \\
- Know how to find roots (including using approximation) \\
- Express fractions as percentages \\
- Compare percentages, fractions and decimals \\
- Calculate percentage of an amount using calculator methods \\
- Calculate percentage of an amount using non-calculator methods \\
- Multiply integers with decimals \\
- Divide a decimal by an integer

- Compare two fractions with different denominators using common denominators \\
- Order a set of fractions \\
- Express fractions as decimals \\
- Express decimals as fractions in their simplest form \\
- Express percentages as fractions in their simplest form \\
- Find fraction of an amount \\
- Multiply vulgar (non-mixed) fractions \\
- Divide vulgar (non-mixed) fractions \\
- Perform multiplication and division calculations involving mixed numbers \\
- Find the reciprocal of a number \\
- Add and subtract vulgar (nonmixed) fractions with different denominators \\
- Perform addition and subtraction calculations involving mixed numbers \\
- Convert between decimals and percentages
\end{tabular} \& 70

75 \& | - Use fractions and percentages to describe a proportion |
| :--- |
| - Solve problems involving percentage change. |
| - Calculate percentage increases and decreases using multiplication. |
| - Use place value when calculating with decimals |
| - Order positive and negative integers using the symbols $=, \neq,<,>, \leq, \geq$. |
| - Round to a number of decimal places or significant figures |
| - Add and subtract positive and negative integers and decimals |
| - Multiply and divide positive and negative integers and decimals |
| - Use order of operations in multi-stage calculations. |
| - Round numbers and measures to an appropriate degree of accuracy. |
| - Use approximate values obtained by rounding to estimate calculations |
| - Use inequality notation to state error intervals and interpret limits of accuracy. |
| - Find the upper and lower bounds on the value of a quantity that has been rounded. |
| - Find the upper and lower bounds of calculations and represent this to an appropriate degree of accuracy. |
| - Find fractions and percentages of amounts |
| - Add, subtract, multiply and divide with fractions and mixed numbers |
| - Convert between fractions, decimals, and percentages | <br>

\hline
\end{tabular}

## Year 11 Spring T2-Graphs 3

## Prior learning:

- Draw a velocity-time graph
- Know the exact trigonometric values for $\left(30^{\circ}, 45^{\circ}, 60^{\circ}, 90^{\circ}\right)$

## Prior learning:

Be able to find the area and perimeter of a shape by counting squares, and calculate the area of a rectangle
Be able to apply multiplication and division
Identify isosceles, equilateral, scalene and right-angled triangles
Recognise and name shapes such as square, parallelogram, rhombus, trapezium and hexagon

\begin{tabular}{|c|c|c|c|c|c|c|c|}
\hline \multicolumn{7}{|c|}{Learning sequences} \& Endpoints \\
\hline \& Grade 1-2 \& MW \& Grade 3 \& MW \& Grade 4-5 \& MW \& \\
\hline  \& \begin{tabular}{l}
- Understand the terms 'perpendicular lines' and 'parallel lines' \\
- Work out the perimeter of a rectangle \\
- Work out the perimeter of compound shapes \\
- Know and use the formula for the area of a triangle \\
- Know and use the formula for the area of a parallelogram \\
- Know and use the formula for the area of a trapezium \\
- Convert between hours, minutes and seconds \\
- Convert between the 12 and 24 hour clock \\
- Calculate the difference between two times using the number line method \\
- Calculate the difference between two times using the arithmetic method \\
- Interpret a distance table \\
- Interpret timetables \\
- Draw a cuboid on an isometric grid and mark its dimensions \\
- Draw 3-D shapes on isometric paper
\end{tabular} \&  \& \begin{tabular}{l}
- To be able to convert between metric units such as m to cm , kg to g , litres to ml \\
- Classify quadrilaterals by their geometric properties \\
- Find the area of compound shapes \\
- Derive and use the formula for the area of special compound shapes (kite, rhombus) \\
- Solve tiling problems involving area calculations \\
- To be able to convert between metric units such as m to cm , kg to g , litres to ml \\
- Know the definition of a circle and identify the, centre, radius, diameter and circumference \\
- Calculate the circumference of a circle to an appropriate degree of accuracy \\
- Find the perimeter of a semicircle and quarter circle \\
- Calculate the area of a circle to an appropriate degree of accuracy \\
- Find the area of a semicircle or quarter circle \\
- Know the definition of a circle and identify the, centre, radius, diameter and circumference
\end{tabular} \& 112
116
118
118
117
116 \& \begin{tabular}{l}
- Understand and use compound measures (SDT, DMV, FPA etc) in simple questions \\
- Understand and use compound measures (SDT, DMV, FPA) in more complex questions involving more than one part \\
- Rates of pay \\
- Rates of flow \\
- Recognise complex parts of circle such as tangents, arcs, sectors, chords and segments \\
- Find the lengths of arcs and perimeters of sectors of a circle \\
- Find the area of a sector of a circle \\
- Compound shapes with areas perimeter and area \\
- Find the area of segments of circles \\
- Calculate the surface area of more complex prisms \\
- Find the surface area of spheres \\
- Find the surface area of cones \\
- Find the surface area of a pyramid \\
- Find the volumes of spheres \\
- Find the volume of a pyramid \\
- Find the volume of cones \\
- Solve algebraic problems involving the surface area/volume of complex shapes \\
- Find the volume of a frustum

$169-171$

172 \& | - Calculate the areas of triangles, parallelograms, trapezia and composite shapes |
| :--- |
| - Identify the number of faces, edges and vertices of 3D shapes |
| - Construct and interpret plans and elevations of 3D shapes. |
| - Calculate the volume of cuboids, cylinders and other prisms. |
| - Apply the formulae for volume and surface area of spheres, pyramids, cones and composite solids. |
| - Identify and apply circle definitions and properties |
| - Find the area and circumference of a circle and composite shapes involving circles |
| - Describe and apply the properties of angles at a point, on a line and at intersecting and parallel lines. |
| - Derive and use the sum of angles in a triangle |
| - Derive and apply the properties and definitions of special types of triangles and quadrilaterals | <br>

\hline
\end{tabular}

\begin{tabular}{|c|c|c|c|c|c|c|}
\hline \& \begin{tabular}{l}
- Name and state properties of 3D shapes, such as vertices, edges and faces \\
- Identify basic 3-D solids \\
- Sketch 3-D solids \\
- Find the volume of a solid by counting cubes and stating units \\
- Recognise nets of familiar 3-D shapes, e.g. Cube, cuboid, triangular prism, square based pyramid \\
- Draw the net of a cuboid \\
- Draw and interpret plans and elevations of 3-D solids \\
- Construct and recognise the nets of 3-D solids such as pyramids and triangular prisms \\
- Draw a 3-D solid given its plan and elevations
\end{tabular} \& 43
