

You can change the world, you can make a difference

You can change the world, you can make a difference

Make the fighting stop dead,

Make the hate freeze ahead,

Spread peace and love,

With the wings of the white dove.

Banish the war from Earth and make it to never come back

Again,

Drain the evil in a flash,

And make people think about each other's health,

Not just money and cash.

Make people do well, not worse

Let's spread happiness through the whole universe!

Make them go from sad to happy,

But don't get snappy.

Make them see the good of the world, just as we were

Taught,

Warm up their hearts, from cold to warm,

Let the love go, it spreads like a swarm.

Pop the grumpiness out of everyone's lives

Let's celebrate with some life pies!

Pull out the sorrow that has been sucked in people's

Hearts,

Don't tell anyone but actually we are all smart!

Smash the weakness into tiny pieces

Let's make each other some masterpieces.

That's what my grandfather had said when I was a child,

You can change the world, you can make a difference!
